# Graph

Graph paper and a pencil. Maps and plots are drawn; everything else is a plain sheet.

### Design system for the adventure platform

A plain, minimal interface for a product that is mostly a document editor: the adventure editor, the campaign editor, the character editor, and the play log.

### Draw only what is spatial.

The graph-paper grid appears on map and plot canvases and nowhere else. Forms, cards, and the play log are plain sheets.

### Mark, do not decorate.

Selection is a highlighter stroke. Errors are a red-pencil underline under the faulty value. Nothing else uses colour.

### One family, two weights.

Public Sans throughout. Hierarchy comes from size and weight, never from a second typeface, capitals, or tracking.

# Colour

Ten tokens. Colour carries meaning only: action, selection, and status. Contrast is measured against the page colour; text tokens meet WCAG AA at body size.

### Sheet
#FBFBF8 page
1.0:1 on page, surface only

Every surface; one level only

### Board
#F1F2EE desk
1.1:1 on page, surface only

Canvas surround, disabled fills, inactive tabs

### Graphite
#2B2D31 ink
13.3:1 on page, AA text

Text, lines, room outlines

### Soft pencil
#62666D muted
5.6:1 on page, AA text

Secondary text, placeholders

### Erased line
#D3D6D9 rule
1.4:1 on page, surface only

Borders and dividers

### Graph blue
#D6E3F0 grid
1.3:1 on page, surface only

Canvas grid only; never used for text

### Ruled blue
#2F5F96 accent
6.3:1 on page, AA text

Primary actions, links, exits and edges, focus

### Highlighter
#FFE45C highlight
1.2:1 on page, surface only

Selection and search matches; text stays graphite

### Red pencil
#B8332A danger
5.7:1 on page, AA text

Errors as underlines and marks, destructive actions

### Green pencil
#356E42 success
5.9:1 on page, AA text

Saved, valid, published

## Pairings

| Aa | Aa | Aa | Aa | Aa | Aa | Aa |
|---|---|---|---|---|---|---|
| 13.3:1 | 5.6:1 | 6.3:1 | 6.3:1 | 5.7:1 | 11.7:1 | 10.8:1 |

# Typography

Public Sans in two weights, regular and semibold, for every role. Sizes follow a 1.2 ratio from a 14 px control size. Sentence case everywhere; no capitals or letter-spacing for labels.

| | | |
|---|---|---|
| Display<br>26/32 px | The Sunken Archive | Page titles |
| Heading<br>18/24 px | Find the core | Record titles: an arc, a room, an NPC |
| Prose<br>15/24 px | The lift hums awake. Somewhere below, water moves against the archive doors, patient as it has been for forty years. | Narration, briefs, room text; max 70 characters |
| Prose small<br>13/20 px | The lift hums awake. Somewhere below, water moves against the archive doors, patient as it has been for forty years. | Trigger narration, topic briefs in cards |
| Control<br>14/20 px | Save changes | Buttons, inputs, menus, tabs |
| Label<br>12.5/18 px | Starting room | Field labels, column headers; sentence case |
| Caption<br>11.5/16 px | Saved 2 minutes ago | Hints, metadata |

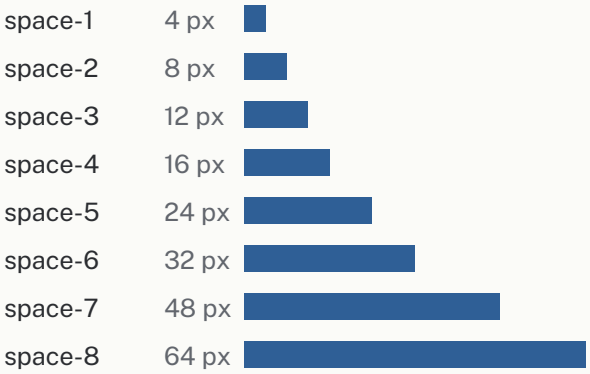
### Measure

Prose columns are 34rem (about 66 characters) wide. Forms are 36rem. Tables and canvases use the full workspace width. Text is left-aligned; nothing is justified or centred except empty-state messages.

# Space, shape, and depth

A 4 px base. Panels are separated by space and a single rule, never by shadows stacked on cards.

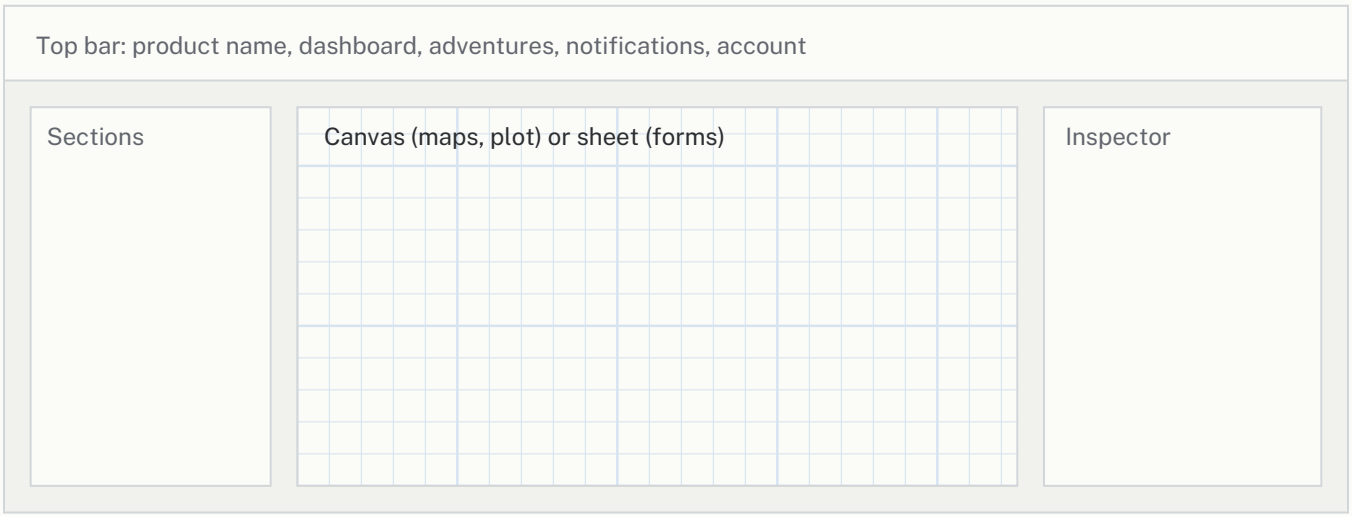
## Spacing scale



## Shape

| | |
|---|---|
| Radius | 6 px on controls and cards; 0 on pages, panels, and canvases; full on avatars and status dots. |
| Borders | 1 px Erased line on inputs, cards, and panel edges. 2 px Ruled blue for focus. |
| Depth | No shadows. Menus and dialogs use a 1 px graphite border on the sheet. |
| Focus | 2 px ring in the accent, 2 px offset, on every interactive element. Never removed. |
| Motion | 120 ms ease-out for opening menus and panels. Nothing moves on page load. Reduced-motion users get instant changes. |

## Application frame



# Components

Controls share one height (30 px small, 36 px default), one radius, and one focus ring.

## Buttons

Publish | Export | Add trigger | Delete arc

One primary button per view. The label names the action, and the confirmation repeats it: Publish, then Published.

## Fields and validation

Starting room

airlock

Players arrive here when an instance starts.

Requires

reactor_cor

Unknown item: reactor_cor is not in this adventure or its settings.

## Pickers and tabs

Archivist Oyelaran | the power core | Find the core: searching

Details | Materials | Members | Invitations

Pickers show labels, never ids. A selected reference reads as a filled token in the accent wash. Tabs mark the active tab with a 2 px accent underline.

## Status

Active · Paused · Lobby · Ended · 2 problems

Status is a dot plus a word, so it never depends on colour alone.

## Rule card

**Hear about the core** — Only once

When a player talks to Archivist about the power core

If arc Find the core is at inactive

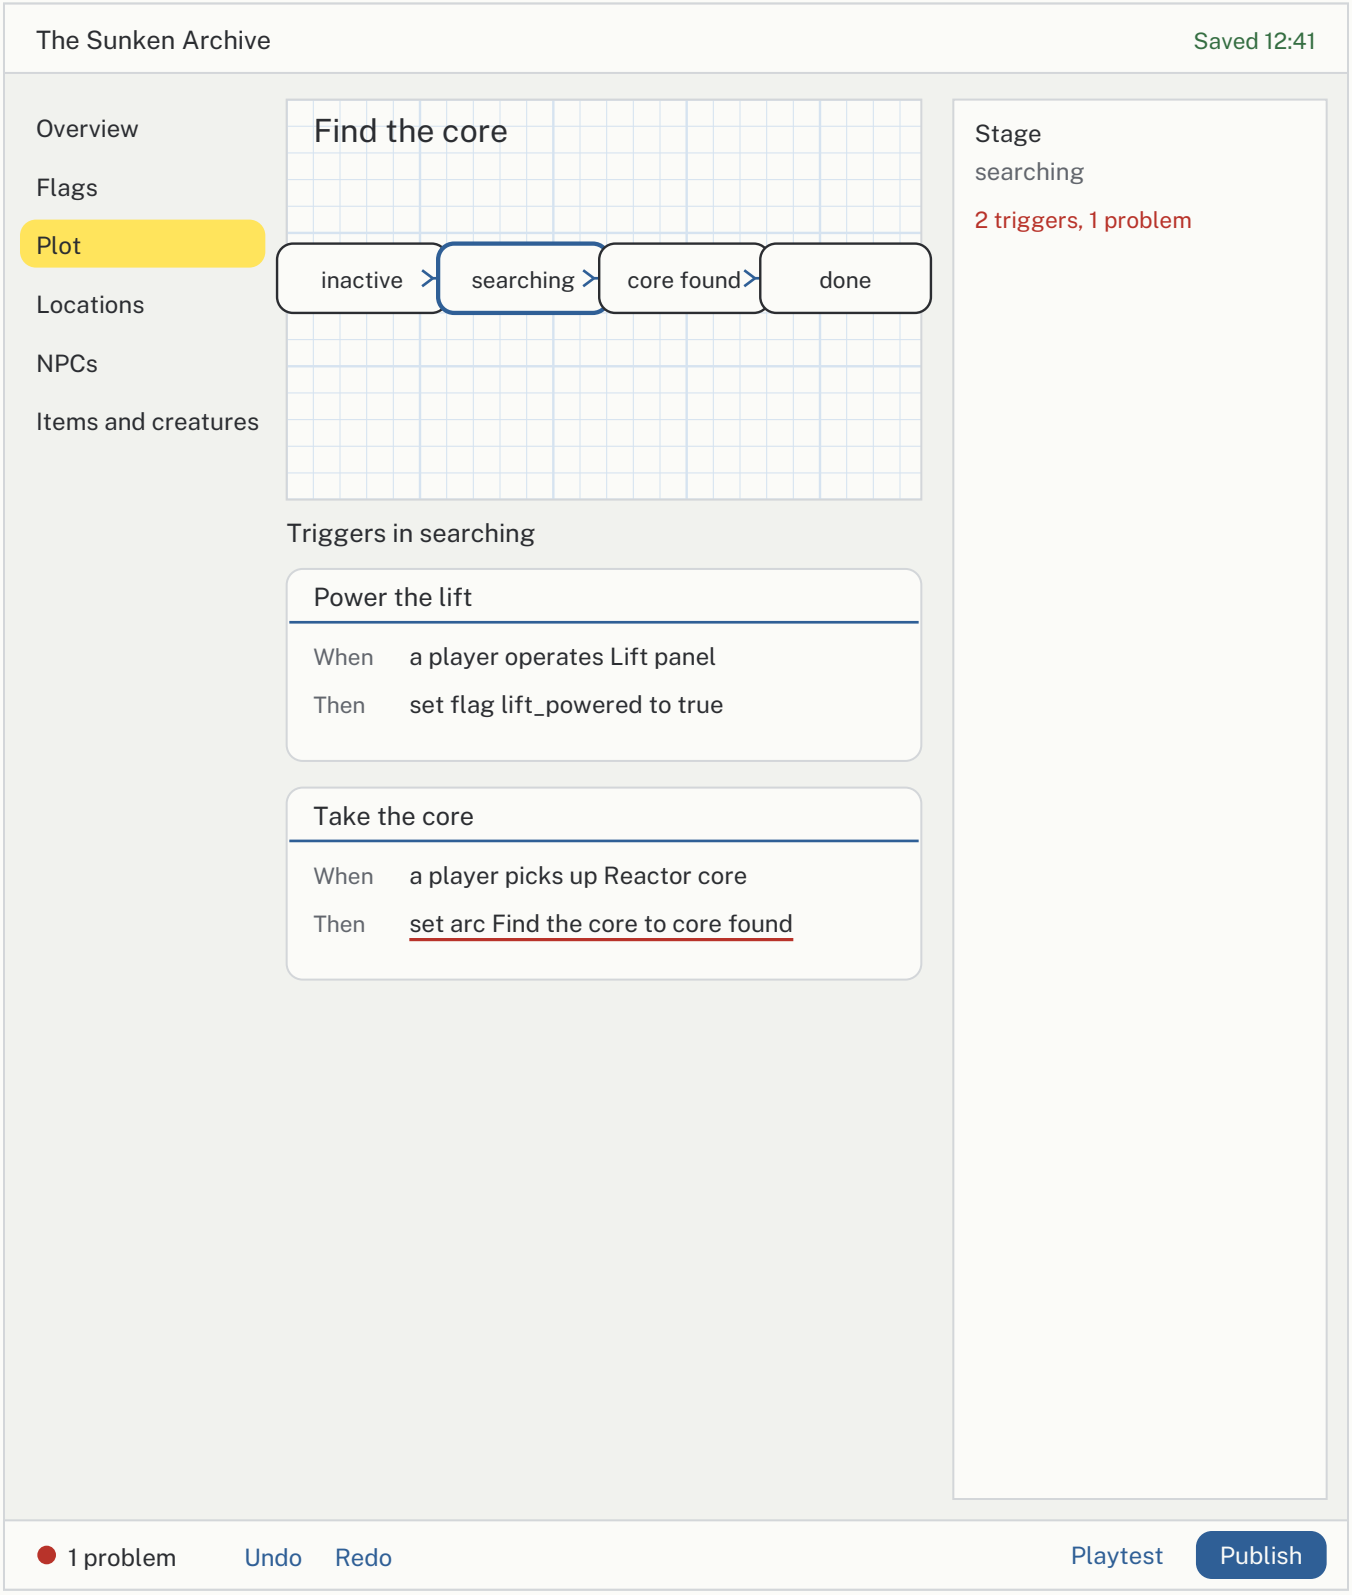
Then set arc Find the core to searching

Narrate *The archivist points toward the lift.*

*Asking the Archivist about the core starts the search.*

# Screen: adventure editor

The Plot section with an arc selected. Sketch at 50% scale.



# Screen: play

A running instance. The log is a page of prose; the software's state sits beside it.

Round 4, everyone acts — Waiting on Rook, 1:42 left

*You: smash the drone with my wrench*

The wrench dents the drone's housing. It staggers, sparks crawling over its arm, and the swing pulls hard at your grip.

Rolled 8, tough choice · Drone: 2 HP left

*Rook: check the control panel*

The panel wakes under Rook's keycard. Somewhere behind the bulkhead, a lift begins to climb.

Lift gate opened

Success, at a cost. Choose a setback:

Strain yourself: lose 1 HP | Drop the wrench

Choose a setback to continue

**Vale, spy**
7/10 HP
8 AP
Heavy wrench, medkit

**Hangar**
Inner door, west
Lift, sealed
Maintenance drone, far

**Party**
Rook, declared
Ash, waiting

# Tailwind tokens

Add to the theme in app/globals.css (Tailwind v4 @theme). Utilities follow: bg-page, text-ink, border-rule, ring-accent, font-prose, font-ui.

```
@theme {
